

## What is a TAG?

A TAG is a label attached to a record for the purpose of identification.

The users are given the rights on this portal to add TAGs to records or add records to existing TAGs

It provides brief official description of the records and helps other users quickly refer to entries that may be of interest to them.

- TAG cloud will be active only when the user log in to the system
- Different TAGs of different size denote the number of files having this TAG. The more number of files, the large the TAG size

## Are TAGs verified?

TAGs are not checked for accuracy as these are created by the users and for the users. We recommend that you seek independent advice or verification before acting on the information. If you find any tags which you believe are incorrect or inappropriate please report it to [archives@nic.in](mailto:archives@nic.in)
